

# How would you cope financially with a critical illness?

How would you and your family cope financially if you were suddenly diagnosed with a critical illness? Would you be able to cover your mortgage and pay your bills?

Coping with a critical illness can be stressful enough without the financial strain of everyday life. Critical illness cover can help relieve you of some of these financial overheads, and allow you to concentrate on what matters most, your health.

Critical illness cover can help provide you with the means to meet financial overheads and cover care costs, reducing worries at a difficult time. It will provide you with a cash sum if you are diagnosed with one of a defined list of critical illnesses or disabilities during the cover term. The plan has no cash in value at any time.
